Oracle Soft Audit Services

Don't be caught off guard!

With increased scrutiny of license compliance, it is more important than ever for organizations to ensure they are compliant.

Often over time, turning on of Database Options, growth and unregulated downloads can cause an organization to become un-intentionally non-compliant. Cornerstone soft audit services utilizes advanced tools to review your Oracle installs and licensing to identify gaps before they become costly audit problems.

Cornerstone soft audit tools can provide a scan of your entire install base across multiple products, environments and entities among varied geographies.

Soft Audit Process:

- Cornerstone uses Oracle Audit Equivalent tools to scan your environment in a non-intrusive way to extract data for audit review.

All Physical and Virtual Environments scanned including:

-Production	-Non-Production
-Testing	-Development
-Staging	-Sandbox
-Q/A	-Data Recovery
-Standby	-Disaster Recovery
-Failover	-Remote Mirroring

Soft Audit output includes information such as:

- Analysis information of hosts on network
- Scans at a database level
- Identification of Products installed
- Identification of feature sets turned on
- Statistical information on product & feature activation/use

Cornerstone Data Systems, Inc.

Your data is your business's most valuable asset. So give your databases the care and attention they deserve while still minimizing cost, and reducing the workload of your IT staff. The numerous benefits of remote database administration are all within reach.

So don't get left behind. Get in touch with Cornerstone today. Our consultants can answer any questions you may have about our process, and we'd be happy to discuss a customized remote DBA solution for your company based on your particular needs, IT infrastructure, and budget.
